

# TEST & MEASUREMENT

## CATALOGUE

THE ELECTRICIAN'S  
**CHAMPION**™

For over 90 years, IDEAL INDUSTRIES, INC. has been enhancing the productivity and safety of electricians who test, measure, or troubleshoot electrical systems. In 2021 we released a new line of testers with the professional electrician in mind. See our new additions in this catalog.

**Finds Opens**

**Finds Conductors  
in Walls, Ceilings and Floors**

**Finds Dead Shorts**

**0-600V AC or DC Lead Set included.**

# CIRCUIT TRACER TRANSMITTER FEATURES

**CertainCircuit™**  
(TR-955)

## ⚡ CertainCircuit™

After the correct breaker has been identified and tripped, the transmitter senses the loss of power and sends a different signal back to the receiver at the panel to give the user confidence that the right circuit has been de-energized.

**Energized**

**De-energized**

**Traces de-energized circuits**

**Inductive Clamp for when direct contact with alligator clips is not possible**

## TR-955

**Inductive Clamp & Battery Pack**  
(For use on circuits carrying up to 120V AC w/less than 5 Amps)  
**IC-958 | BP-958**

**Cradle**  
(For use on RC-955 & RC-959 Receivers)  
**CR-959**

**Tracer Test Lead Set TL-956 (includes the following)**

1. 3 Ft. Lead Adapter for Transmitter (set of 2)
2. 25 ft. Lead Adapter for Transmitter
3. Alligator Clips (set of 2)
4. Blade Prongs
5. Prong for Lead Adapters
6. Outlet Plug Adapter for Transmitter

# CLAMP/FORK METER VS. MULTIMETER

**Safety** - A fork meter allows you to measure AC or DC current (depending on the model) by positioning the fork around a conductor, which is much safer than making direct contact with a live circuit.

**Productivity** - During a measurement, it is not necessary to shut off the circuit carrying current, which improves productivity.

*Limited to 200A AC/DC Measurement*

*No Fuse Protection required*

**Safety** - A clamp meter allows you to measure AC or DC current (depending on the model) by positioning the clamp jaw around a conductor, which is much safer than making direct contact with a live circuit.

**Productivity** - During a measurement, it is not necessary to shut off the circuit carrying current, which improves productivity. This allows isolation of a conductor being tested in a bundle of conductors.

*Limited to 2000A AC/DC Measurement (Hard Clamp)*

*No Fuse Protection required*

Multimeters measure current differently than a fork or clamp meter. To measure current with a multimeter:

- You must insert the multimeter into the circuit to get the current to flow THROUGH the meter and are making direct contact with the live circuit.

To properly conduct a current measurement in accordance with Electrical Safety-related Work Practices (ESWP) you must:

- de-energize the circuit, disconnect the circuit, insert the meter into the circuit, re-energize the circuit to test current
- AND THEN... repeat the whole process again to "remove" the meter from the circuit after the test.

*Limited to 10A AC/DC Measurement*

*Fuse Protection required (due to current pass-through)*

# VOLTAGE TESTERS

## FEATURES

Scan with your smartphone to see a video and learn more

**61-557**

**Non-Contact Voltage**

**Audible Indication**  
for NCV, Continuity &  
High Voltage

**Backlit Display**

**Universal Magnetic  
Strap Clip**

**LoZ**  
Eliminates Ghost  
Voltage

**Probe Holder  
for Storage**

**GFCI Test**

**TL-757**  
Test Leads

**UMHS-757**  
Universal Magnetic  
Hanging Strap (61-557)

# VOLTAGE TESTERS SELECTION GUIDE

## 61-557

Voltage and Continuity Tester w/LCD, GFCI, Flashlight & NCVT  
6-600V AC/DC, CAT IV 600V

## 61-547

8 Level AC/DC Voltage Indicator with Polarity Indicator  
12-600V DC | 24-600V AC  
CAT III 600V

## 61-076

Vol-Con® Voltage/Continuity Tester  
5-600V AC/DC  
CAT III 600V

## 61-065

Vol-Test® Voltage Tester  
100-600V AC/DC  
CAT III 600V

# SAFETY IN THE FIELD

## IEC (International Electrotechnical Commission) Category Ratings

**Category I** – The signal level for telecommunications, electronic and other low-energy equipment with transient limiting protection. Peak impulse transient range is 600-4,000 volts with 30 ohm source.

**Category II** – The local level for fixed and non-fixed powered devices including appliances, lighting and portable equipment. Outlets located more than 30 feet from CAT III sources and 60 feet from CAT IV sources. Peak impulse transient range is from 600-6,000 volts with a 12 ohm source.

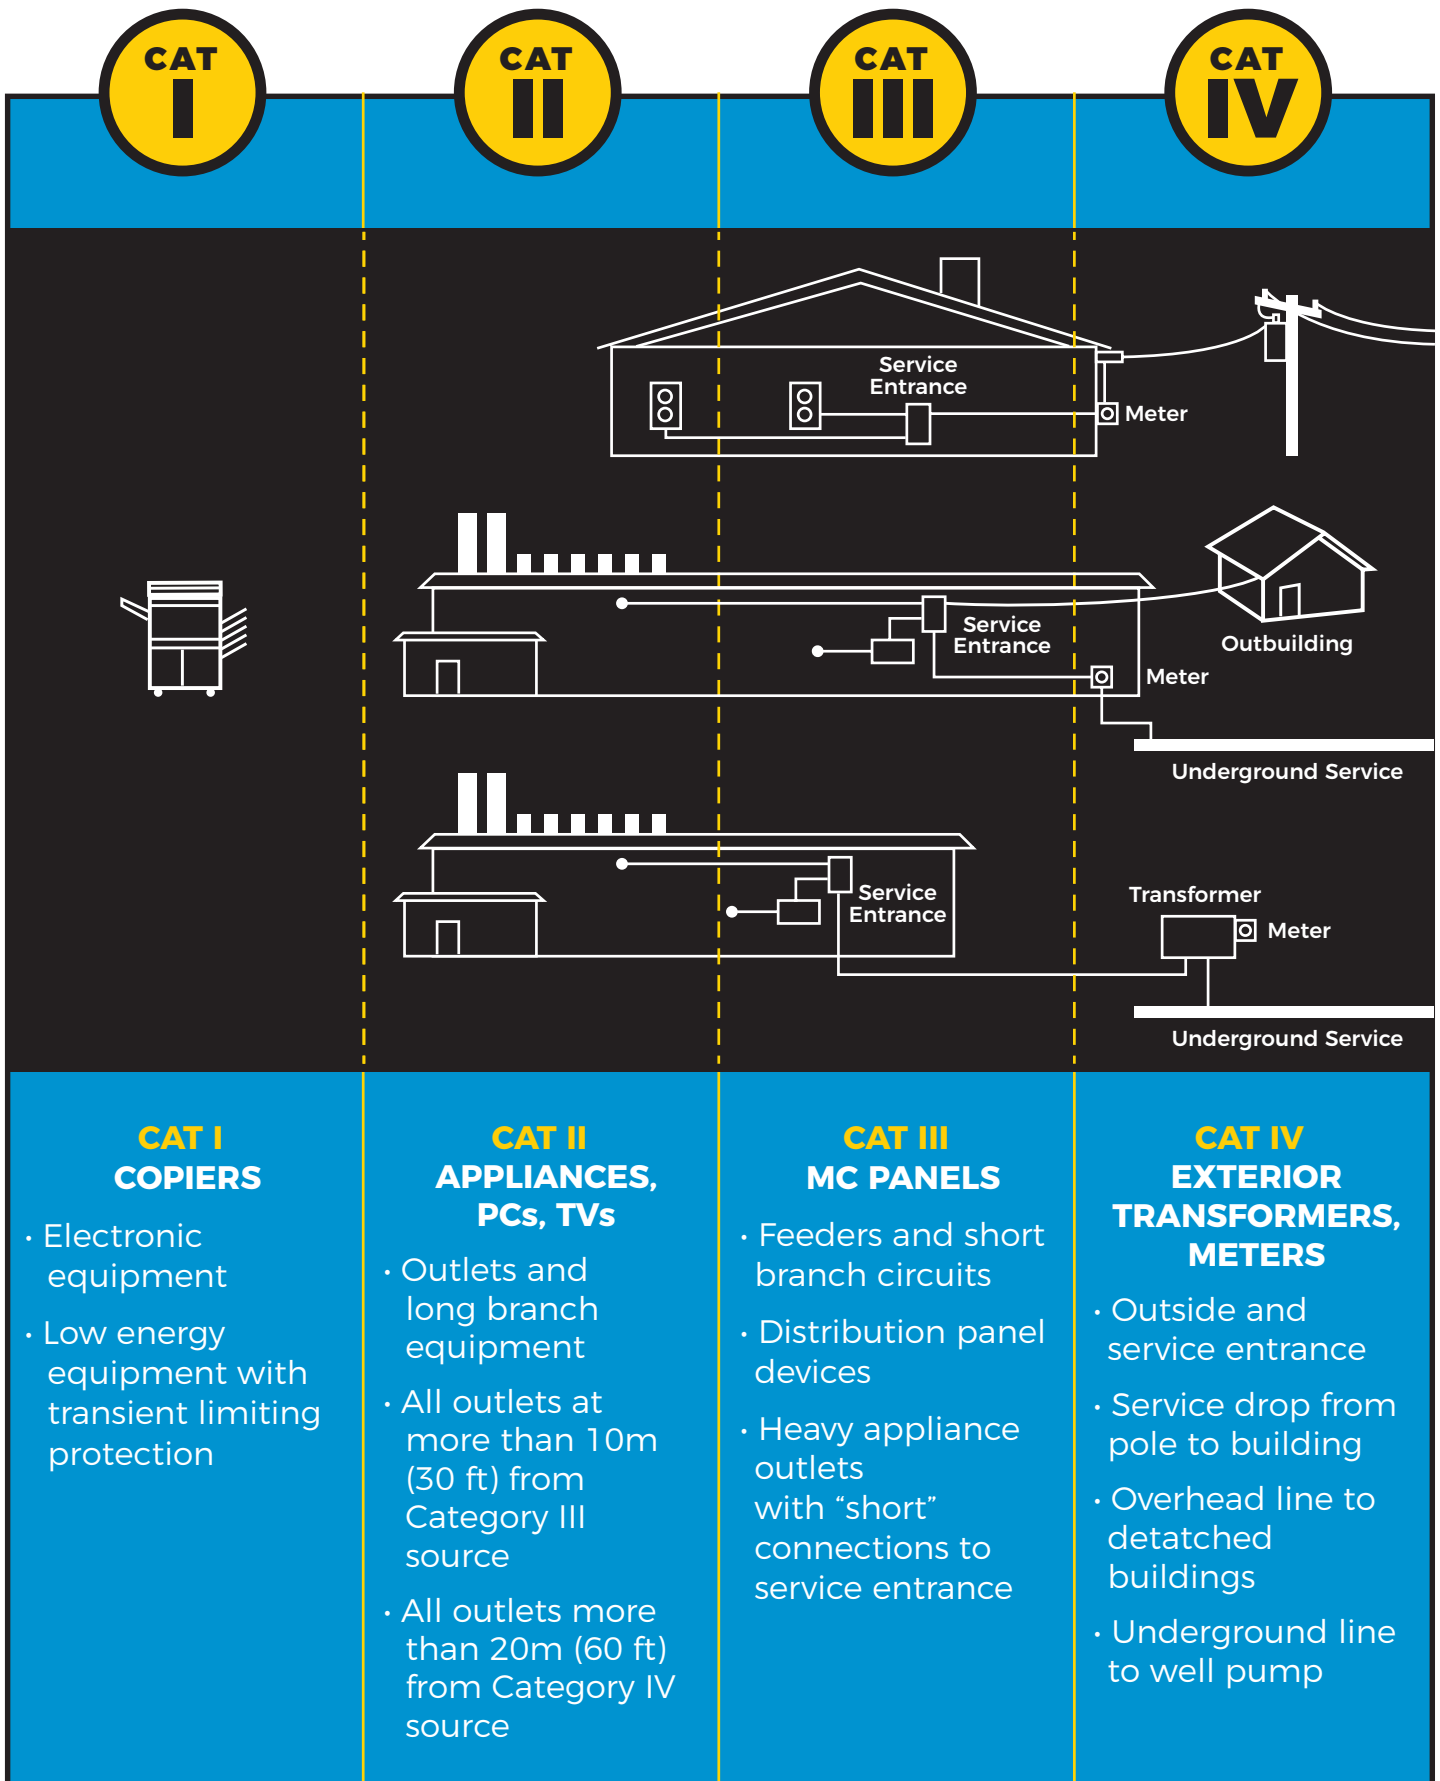

**Category III** – The distribution level for fixed primary feeders or branch circuits. Circuits that are separated from CAT IV sources by at least one level of transformer isolation. Peak impulse transient range is 600-8,000 volts with a 2 ohm source.

**Category IV** – The primary supply level for the highest levels of transient over voltage. Includes the utility service both outside and at the service entrance, service drop from the pole to the building, overhead line to remote buildings, and underground line to a well pump. Peak impulse transient range is 600-12,000 volts with less than a 1 ohm source.

Visit [idealind.com](http://idealind.com) for more technical product details, application support, white papers, videos and software.

**CAT I  
COPIERS**

- Electronic equipment
- Low energy equipment with transient limiting protection

**CAT II  
APPLIANCES,  
PCs, TVs**

- Outlets and long branch equipment
- All outlets at more than 10m (30 ft) from Category III source
- All outlets more than 20m (60 ft) from Category IV source

**CAT III  
MC PANELS**

- Feeders and short branch circuits
- Distribution panel devices
- Heavy appliance outlets with "short" connections to service entrance

**CAT IV  
EXTERIOR  
TRANSFORMERS,  
METERS**

- Outside and service entrance
- Service drop from pole to building
- Overhead line to detached buildings
- Underground line to well pump
